## Protect your health and well-being with 100% covered services.

**You pay nothing for preventive care and routine screenings when you choose a network doctor.**

Regular checkups and routine screenings help protect your health. That's why it's important to see your doctor each year, even if you feel healthy. Your doctor can identify risk factors for diseases, share tips for healthy living, make sure your immunizations are up-to-date and identify health issues before they become a problem.

# 100% covered in-network

## Annual adult routine exams and immunizations

Regular preventive care visits are part of maintaining a good relationship with your primary care doctor.

## Well-child exams and immunizations

Regular exams and tests are an effective way to track your child's health and development. Pediatricians recommend well-child checkups for kids and teens.

## Lab tests

Lab tests (covered blood work performed at LabCorp and Quest Diagnostics) are covered 100%.

## Maternity care

Regular prenatal visits throughout your pregnancy can help catch potential issues early and reduce the risk of complications.

## Breast cancer screenings

Treatment is more likely to be successful the sooner breast cancer is detected. The plan offers 100% coverage for in-network annual mammograms for women starting at age 40. Women age 65 and older can get a mammogram every calendar year.

## Diabetes screenings

The symptoms of diabetes are often hard to spot. If you have any risk factors for diabetes, talk to your doctor about getting your blood sugar tested.

## High blood pressure screenings

High blood pressure—also known as hypertension—often has no symptoms, so it's important to be screened at your annual routine exam.

## Diet and nutrition support

Visits to a registered dietician/nutritionist are covered 100%.

## Emergency care

You're covered 100% for accidental injury outpatient services within 72 hours.

## Members pay \$0 for lifestyle management programs.

These programs offer 24/7 access to online resources and tools. Participants also receive a welcome letter and workbook, along with post-graduation follow-up calls.

**Tobacco cessation** targets physical, emotional and social addiction and uses best practices to improve success. Nicotine replacement therapy is available at no extra charge.

**Weight management** focuses on the role emotions and sensations play in eating patterns. Participants can achieve sustainable weight loss by making small changes.

## COVID-19 vaccines are safe, effective and free.

Getting vaccinated is the best way to protect yourself from COVID-19. And the vaccine can help keep you from getting seriously ill if you get infected.

Visit [apwuhp.com](https://apwuhp.com) to learn how to get your COVID-19 vaccine.
