

Patient Protection and Affordable Care Act - Preventive Items and Services

Drug List – Preventive Items and Services Offering - 2023

The Patient Protection and Affordable Care Act (PPACA) imposes a number of insurance reforms and mandates including a requirement to cover certain *preventive items and services* at 100 percent and ensure these items and services are not subject to deductibles or other cost-sharing limitations.

The following list of preventive medications should be used as a guide. It cannot be considered a comprehensive listing of medications available or covered without cost-sharing. Coverage of any of the listed medications (including over-the-counter (OTC) medications) requires a prescription from a licensed health care provider.

The availability or coverage of these medications without cost-sharing may be subject to criteria established by the terms of the health plan.

This list is subject to change as PPACA guidelines are updated or modified.

Please note: coverage of medications at \$0 cost share is dependent on the list of medications covered by your Plan's formulary.

Medicine Category and Who is Covered	Examples of Medicines Covered
Aspirin for prevention of preeclampsia	Aspirin doses 81mg generic
Breast Cancer – Primary Prevention Persons ≥ 35 years who meet criteria.	Co-Pay Exception Review only: Tamoxifen generic; Soltamox; and for post-menopausal persons: Raloxifene, Anastrozole, and Exemestane generic
